# PURE OFFICES

Get Connected

Our fast business broadband helps your company stay one step ahead of the competition...

We understand that fast and reliable broadband is essential to the success of any business. Pure Offices' infrastructure has been designed specifically for business use. Included with every office is a 20MB:2MB contested line, which can be upgraded quickly to 30MB:30MB or 50MB:50MB. We also have firewalls and a MESH system that segregates VOIP and data in order to provide quality calls. We have the ability to tailor our system to your needs.

Smart & Affordable Serviced Offices
Unrivalled facilities. Flexible contracts.

Serviced Offices to Rent

Features

Fast & Reliable

Our offices have 100MB lines as a minimum and we have backup lines for reslilience to keep your business running.

No Contracts

No long term commitments. Monthly rolling contracts, just like your serviced office.

Instant Availability

Just bring your computers or laptops and plug in! No lengthy waiting for surveys and line upgrades.

Flexible & Secure

Upgrades can generally be provided within 24hrs. We can also tailor our system to meet your IT security needs.

Fast, Flexible & Reliable!

"Our business relies on fast and reliable broadband for connecting to shared resources in our other offices. Pure Offices were able to provide me with 50MB dedicated line within a day as opposed to lengthy surveys and delays in traditional office lease agreements. The service is great value for money and is also much more flexible than services you'll find at standard business broadband providers who tie you into long contracts!"
